Hashinclude, Trivandrum   Nov 2021 - July 2023
Junior Software Developer

- Collaborated with project managers to establish ambitious and attainable coding milestones for pre-release software projects.
- Engaged in all phases of the systems development lifecycle, from initial requirement gathering to successful production releases.
- Conducted rigorous testing and seamless deployment of scalable, highly available software products.
- Translated intricate technical concepts into plain language, facilitating comprehension for diverse stakeholders.

- VS code
- Figma
- Postman
- Prototype
- Microsoft Office
- Codebase Optimization
- Usecase Development
- Project Collaboration
- Manual Testing
- Problem Solving

LANGUAGES

- English (Fluent)
- Malayalam (Fluent)
- Hindi (Basics)

- Successfully revitalized and modularized outdated codebases to adhere to modern development standards, resulting in cost reduction and enhanced functionality.
- Transformed intricate customer requirements into meticulously documented use cases, guiding project development.
- Actively participated in field testing to validate the performance and functionality of developed software projects.
- Effectively led discussions within the team to identify and resolve issues, implementing best practices for optimized project outcomes

Projects worked on :

- Diving App

Translated project requirements into wireframes, use cases, and user flow diagrams, ensuring client verification.

Single-handedly developed a comprehensive admin panel dashboard from scratch using Angular for the diving app.

Meticulously tested both the mobile app and web app, conducting cross-testing of the admin dashboard from a user perspective.

- Xamians Productivity Enhancing Programme

Collaboratively designed a cutting-edge dashboard for the Xamians productivity app, skillfully employing the model-view-controller architecture within Angular

- Insurance Portal

Played a pivotal role in crafting a dashboard for an insurance portal, showcasing frontend development expertise with the Angular platform
